

Advisory

Your guide for
December meetings

Councils: *Speak Out*

Advisory Council discussion questions:

Animal traceability: See page 4

1. Evaluate the new plan for animal traceability from a farmer's perspective. What is your opinion of the new proposal? Are there any changes that you would make?
2. Now take a look at the proposal from the standpoint of the USDA and animal health. How does the plan look from that perspective?
3. To find out more information, and to leave comments, the USDA encourages you to visit its website at <http://www.aphis.usda.gov/traceability/>. What is the message you want to communicate to USDA?
4. From a grassroots perspective, are there any OFBF policy suggestions/changes that you would make when it comes animal traceability? If so, what are they and what would you like to see happen?
