

2015 Tree Seedling Sale

The Clear Fork FFA Alumni, in partnership with the Richland Soil and Water Conservation District (Richland SWCD), announce the 2015 tree seedling sale. [Go to Clearforkffa.com](http://Clearforkffa.com) and Richlandswcd.net

Sale Locations:

Richland County Fairgrounds Nature Park: Friday, April 10 from 9:00 a.m. to 6:00 p.m. and Saturday April 11 from 8:00 a.m. to 1:00 p.m.

Clear Fork High School back parking lot, Friday, April 10 from 8:00 a.m. until 5:00 p.m.

County Metals Parking lot, Friday, April 10 from 9:00 a.m. until 5:00 p.m.

Note: All sales are final with no guarantee of survival

Species Available for Purchase

COST: \$10.00 per Bundle of 8

Evergreens

Colorado blue spruce 8-12"
Norway spruce 8-12"
White pine 6-14"
Austrian pine 8-12"
Arborvitae 8-14"

Large Trees

White oak 12-18"
Sugar maple 6-12"
Persimmon 12-18"
Tulip tree 12-18"
Red Oak 12-18"
Black Walnut 12-18"
Scarlet Oak 12"-18"

Broadleaf Shrubs

Flowering Dogwood 6-12"
Red Mulberry 12-18"
Ohio Buckeye 6-12"

Tree Nut pack

Hazelnut, Butternut,
Black Walnut

Flowering Pack

Dogwood, Serviceberry
Roselow Crabapple,

Wildlife pack

Persimmon, American
Plum, and saw tooth oak

**Bluebird houses and
feeders available**

\$10.00

Spruce (Ten years from planting these trees will be approximately 6-8 feet tall)

Colorado blue spruce (*Picea pungens*): Sharp pointed needles, green to blue color. Plant on dry, well-drained sites; slow growing, dense. Columnar to pyramidal form ranging from 10-20' wide. Full sun. Height: 30-50'.

Norway spruce (*Picea abies*): One of the faster growing spruce. Extremely attractive, pyramidal evergreen with strong, distinctive sweeping branches all the way to the ground. Shiny green, 1/2-1" long flat needles. Grows on most sites except where soil is sour or water soaked. Height: 80-100'.

Pine (Ten years from planting these trees will be approximately 8-10 feet tall).

White Pine (*Pinus strobus*): A shade tolerant native tree, does best in full sunlight. Fast growing, grows well in a wide range of soil types. Soft light, green needles in clusters of five. Height: 80'.

Austrian Pine (*Pinus*): The needles are in pairs 4 to 6 inches long with the ends being very sharp to the touch and the buds are

Other Evergreens

Arborvitae American Arborvitae (*Thuja occidentalis*): Pyramidal in habit. Leaves are frond-like on flat branches varying from dark green to light green during the growing season. Grows best in loamy, moist soil. May be planted as an ornamental, hedge or windbreak. It is also a good source for wildlife food, shelter from enemies and elements and nesting cover.

Large Trees

White Oak (*Quercus alba*): Grows well in all but very wet soils, in all open exposures. Large spreading tree, dark gray, brownish bark. Blooms in May, Fruit in autumn. All oaks provide excellent wildlife benefits. Height: 60-80'. Height in 10 years 8-10'.

Sugar Maple (*Acer saccharum*): Plant in well-drained soils. Maple is extensively planted for timber, as a shade tree, and for maple syrup. Large shade tree has dark green foliage turning to yellow to orange to fiery red in the fall. Height: 100'. Height in ten years 14-16' tall.

Persimmon (*Diospyros virginiana*): tough and adaptable grows rapidly, and its deep tap root gives it good drought resistance. Seedlings planted in good soil and a sunny location can begin fruiting in about 6-8 years. In addition to its fruit-bearing potential, the American Persimmon can make an attractive mid-size yard tree. Height: 30-70'.

Tulip Tree or Yellow Poplar (*Liriodendron tulipifera*): found throughout all of Ohio, the tulip tree is named for the appearance of its showy flowers and the silhouette of its large leaves, both of which resemble tulips. It frequents moist woodlands and edges of fields, especially on downslopes where water drains. Quickly reaches a height of 80'.

Red Oak Bristle-tipped leaves turn red in the fall. The leaves have 7 to 11 waxy lobes. A good street tree, tolerates pollution and compacted soil. Grows to 60' to 75', 45' spread.

Black Walnut for timber, nuts, and agroforestry

Scarlet Oak Fast-growing and tolerates a wide range of soils. Leaves are glossy deep green on top, paler green below, and scarlet in fall. Crown is open and rounded, providing light shade. Grows to 60' to 80', 40'-50' spread.

Wildlife Pack Persimmon, American Plum, and Saw Tooth Oak. Created specifically for those who enjoy developing a healthy wildlife habitat, this package includes three different varieties of seedlings. Plant these trees in the same general area for optimal results.

Broadleaf Shrubs

Flowering White Dogwood (*Cornus florida*): Grows 15-30' tall. Easily grown in average, medium moisture, well-drained soils in full sun to part shade. Prefers moist, organically rich, acidic soils in part shade. Enjoy the attractive blooms in the spring and the shades of red leaves in the fall.

Red Mulberry (*Morus rubra*): Grows 30-60' tall. Can grown in full sun to light shade, moist conditions and different kinds of soil. A wide range of soil pH is tolerated. Trees can bear fruit as little as 10 years and live up to 125 years.

Ohio Buckeye (*Aesculus glabra*): Found primarily as an understory tree in the eastern half of Ohio, where the soils are more alkaline in pH. A native of the Midwestern and Great Plains states, trees found in the open may reach 60' tall by 30' wide, but as a native understory it is often half that size. As a member of the Horsechestnut Family, it is related to other Horsechestnuts and Buckeyes.
