

# Do Your Homework While Investing in Renewable Energy

Monday, May 18, 2015 - 7:00 to 8:30 PM

Sustainability Center, Cuyahoga County Fairgrounds 19201 Bagley Road, Middleburg Heights, OH 44130

Join Green Energy Ohio (GEO) to hear Dale Arnold, Director of Energy, Utility and Local Government Issues, OFBF;

Board Member and Policy Chairman, Green Energy Ohio discuss how advances in technology have made renewable energy equipment, particularly solar and wind, more practical than it was just five to ten years ago.

Farm, small business and residential energy consumers looking to invest in this technology need to think the same way as they would when purchasing a major piece of farm equipment or real estate.

A Quasar Energy representative will also speak on Ohio's renewable energy industry.

**Free to the Public – Register at <https://eventbrite.com/event/16676635265/>**

## GEO Northeast Ohio Clean Energy Network Meeting

Program supporters: Cuyahoga County Agriculture Society Sustainability Center and Cuyahoga County Farm Bureau.
