

BROUGHT TO YOU BY:

BREAKFAST BRIEFING

Unmanned Aerial Systems and Precision Agriculture

PROGRAM

It is estimated that 80% of Unmanned Aerial Systems (UAS) operations will support precision agriculture applications once they are fully integrated into the National Airspace System. This engaging breakfast briefing will briefly explore the applications and benefits of UAS utilization in support of precision agriculture. Additionally, it will touch on currently permitted operations under existing regulations and what may be allowed in the near future once approved by the Federal Aviation Administration.

FACILITATOR

Dr. Andrew Shepherd serves as the Director for Unmanned Aerial Systems at Sinclair Community College in Dayton, Ohio. He is the Managing Editor for the Journal of Unmanned Aerial Systems, an Editorial Advisory Board Member for the Two Cultures Journal, and as a Board Member for the Aviation Trail, a non-profit corporation in partnership with the National Park Service to promote Aviation Heritage in the Dayton region.

UAS AT SINCLAIR

Sinclair's National UAS Training and Certification Center provides state-of-the-art learning spaces, a wind tunnel, and engine testing and avionics labs, in addition to a new 3,200 square foot UAS Indoor Flying Pavilion for testing prototypes, flight training and more. Sinclair College is recognized as a national leader in UAS, supported by world-class partnerships, cutting-edge technology, and custom training programs designed to drive the expansion of the UAS industry. Sinclair's curriculum focuses on real-world applications of emerging UAS and sensor technologies through classroom and online instruction, simulation and hands-on vehicle operations.
