**RSVP by June 12 by calling the county Farm Bureau  
office at 937-335-1471 or email [miami@ofbf.org](mailto:miami@ofbf.org)**

## *About the Lunch Series:*

Join us in for our first ever Lunch Series! Our first topic will be on pollinators. More details to come for the next Lunch series happening on September 15, 2017!

## **Synopsis:**

Pollinators, including native bees, insects, birds, butterflies and more, are responsible for one out of every three bites we take. However, in recent years, pollinator numbers have been decreasing due to disease, environmental conditions, pesticide use and more. Learn how you can do your part to protect pollinators and what those in the agriculture profession are doing to protect these vital assets to our environment.
