

Client education program

Our comprehensive webinar-based educational program for clients covers a variety of safety-specific topics.

2026 series

All sessions require registration. Course descriptions, dates and times are listed below. Sessions are in 2025 unless otherwise noted. All webinar times are EDT/EST.

OSHA/PERRP recordkeeping

We discuss how to determine whether an injury or claim is recordable, as well as review the key requirements of the OSHA and PERRP recordkeeping process including compliance dates, exemptions, posting requirements and records retention. There will be examples and time for questions and answers, as well as information on how to submit your OSHA and PERRP Summary information online for those that are required to do so. We will have separate webinars for OSHA Recordkeeping and PERRP Recordkeeping. Sessions are one hour.

PERRP Recordkeeping	Jan. 15	10 a.m.	REGISTER
OSHA Recordkeeping	Jan. 15	2 p.m.	REGISTER

PERRP top ten violations

We will dive into the ten most common violations reported by the Public Employee Risk Reduction Program (PERRP). PERRP is the enforcement arm for public entities and the hazards associated with these violations not only jeopardize employee safety but also can lead to significant

penalties for the employer. We will explore each violation, their implications and effective strategies to maintain compliance and promote a safer working environment.

Session	Feb. 17	10 a.m.	REGISTER
----------------	---------	---------	----------

OSHA top ten violations

A great way to evaluate your safety program in the private sector is to compare it to what OSHA inspectors are finding in the workplace. During this webinar we will dive into OSHA's Top Ten Most Cited Violations for the most recent fiscal year and what you can do to minimize or eliminate the chance of receiving a citation.

Session	Mar. 25	2 p.m.	REGISTER
----------------	---------	--------	----------

Forklift safety

We all know that operating a forklift can be dangerous to both operators and pedestrians, which is why forklift safety has been a priority for the Occupational Safety and Health Administration (OSHA) for many years. During this webinar we will discuss OSHA's forklift standard as well as the regional and local emphasis programs focused on forklift safety, how to develop a forklift safety training program and tips on creating a safe workplace where powered industrial vehicles are in use.

Session	Apr. 9	10 a.m.	REGISTER
----------------	--------	---------	----------

Heat emphasis program

OSHA announced a National Emphasis Program (NEP) on Outdoor and Indoor Heat-Related Hazards and developed guidelines for employers in specific high heat-hazard industries to use to protect their workers. During this webinar, we will discuss the highlights of OSHA's Heat Stress guidelines and lay down a foundation of how companies can protect their employees from heat related illnesses and be prepared for an inspection.

Session	May 19	2 p.m.	REGISTER
---------	--------	--------	----------

Machine guarding/Lockout tagout

Proper machine guarding and an effective Lockout/Tagout program are key to minimizing employee injuries while operating or maintaining equipment. During this presentation we will discuss both machine guarding and Lockout/Tagout focusing on danger zones such as pinch points and points of operation. In addition, we will discuss the requirements of OSHA's Lockout Tagout standard and why these violations consistently fall onto OSHA's top ten list. Class is two hours.

Session	June 17	10 a.m.	REGISTER
---------	---------	---------	----------

Fall protection

For years, the Fall Protection standard has been on the top of the OSHA's Top Ten Violations list. Complying with this standard is important to employee safety as well as assuring you are being compliant with the regulation. During this webinar, we will discuss OSHA's Fall Protection requirements, including training, to guide you in protecting your employees when working at heights no matter what industry you are in.

Session	July 23	2 p.m.	REGISTER
---------	---------	--------	----------

Hazard communication

Chemicals are commonly used in the workplace and protecting employees from their exposure is key to a safe workplace. OSHA's Hazard Communication standard was created to assist employers with protecting their employees from the hazards of the chemicals they work with. We will be discussing the Hazard Communication Standard and the steps needed to be compliant.

Session	Aug. 18	10 a.m.	REGISTER
---------	---------	---------	----------

Ladder safety

Ladders are used in so many aspects of our life. Whether you're in construction, maintenance or any industry requiring ladder use, this session will equip you with the knowledge to minimize or prevent accidents and injuries. We will explore OSHA's ladder safety requirements, where we'll look at the guidelines and best practices for maintaining a safe working environment when using ladders.

Session	Sep. 22	2 p.m.	REGISTER
---------	---------	--------	----------

Injury investigation and root cause analysis

A proper injury investigation and root cause analysis are essential steps in conducting thorough investigations of workplace injuries. During this session we will discuss the injury investigation process including gathering evidence, interviewing witnesses and analyzing data to identify underlying issues. Additionally, we will discuss root cause analysis to prevent future incidents and promote a culture of safety.

Session	Oct 15	10 a.m.	REGISTER
---------	--------	---------	----------

OSHA/PERRP inspection and citation process

No matter why your organization receives an inspection from the Occupational Safety and Health Administration (OSHA) or the Public Employment Risk Reduction Program (PERRP), it is vital to assure you are prepared at all times. In this session, we will look at the inspection process of both agencies and discuss steps you should take to assure you are prepared in the event they arrive for a visit.

Session	Nov. 10	2 p.m.	REGISTER
---------	---------	--------	----------

PPE assessment and PPE regulations

One of the ways to ensure a safe workplace is to perform a personal protective equipment (PPE) hazard assessment. An effective PPE assessment identifies hazardous areas and provides employers with the necessary equipment to protect employees. We will review OSHA's PPE Standards, how to perform a hazard assessment and look at the necessary steps needed for compliance. Class is two hours
